

UNIT SECURITY

ENTRY AND EXIT PROCEDURES FOR LIVESTOCK

Loading ramp – basic principles of design

ON FARM LOADING RAMP

OFF FARM

Loading ramp rules	
1	Lorries must have no pigs on board, must be clean, washed and disinfected
2	The off-farm disinfectant/washing area (see above) must be prepared prior to each loading by the unit staff, (wearing off-unit clothing) and then they must re-enter the farm
3	The lorry driver must inform a member of staff using the klaxon upon arrival
4	The lorry drivers must wash their hands and wear the over-boots provided and dip the boots in the disinfectant provided
5	The lorry driver's name and vehicle number should be logged in the animal movement book
6	Farm staff must not cross the security fence line or the loading ramp
7	The loading ramp area must be thoroughly cleaned after loading each batch of pigs
8	The lorry driver must not enter the unit, under the security fencing onto the on-farm ramp, to assist the loading
9	All entry and exit points should be well lit, ideally with proximity sensors
10	The sorting area and on-farm loading area must be thoroughly cleaned and disinfected once the pigs have arrived or left
